

Write a C program to prepare the **merit list of students** using **structures, pointers, functions, and dynamic memory allocation**.

Each student has:

- name
- admission number
- year
- CGPA

Create records for **20 students**:

- 5 from 1st year
- 5 from 2nd year
- 5 from 3rd year
- 5 from 4th year

The merit list must be prepared using the following rules:

1. Higher CGPA gets higher rank
2. If CGPA is the same, higher year gets higher rank
3. If CGPA and year are the same, lower admission number gets higher rank

Use dynamic memory allocation and functions.
