

Mid-semester Examinations Winter Semester 2024-25

Course: Understanding Human Behaviour

Model Answers – Part A

[Personality Section]

Total Marks = 9

Answer 1 .

1. Rationalization (*1 mark*)

- When Mark sees the discount offer, he uses rationalization to justify his impulsive purchase by convincing himself that the gadget is essential for his success.

Note: If you have written Intellectualization with the correct explanation (0.5 mark)

2. Intimacy vs. Isolation OR Early Adulthood OR 25 years old (*2 marks*)

- At 25 years old, Mark is in the Intimacy vs. Isolation stage of Erikson's psychosocial development.
- The primary developmental need at this stage is forming close, meaningful relationships.
- His impulsive spending and gratification-seeking behavior may indicate struggles with emotional investment, increasing the risk of isolation.

Note : 1 mark for identifying the name of the stage and 1 mark for the explanation

3. Low Conscientiousness and High Neuroticism (OCEAN Model) 1 marks for the correct explanation of both part. (*2 marks*)

- Mark displays low conscientiousness, as seen in his impulsive spending and lack of self-discipline. This trait makes it difficult for him to plan and regulate behavior.
- He also exhibits high neuroticism, leading to anxiety and guilt over impulsive decisions.
- Both traits contribute to challenges in forming stable and intimate relationships

Note: Explanation for both parts must include the following points

Answer 2

- Identity vs Role confusion OR Adolescence OR 12-18 age (1 marks)
- If someone is able to understand their identity, their needs help in realising their ideal self and real self and thus in turn help in the congruence between the two.
- On the other hand, if they are confused about their own role it will lead to incongruence between Real Self and Ideal Self. (3 marks)
